DETAILED ACTION

1. Applicant's amendment filed 6/30/2009 has been fully considered.
2. Claims 1, 4-6, 9-13, and 16-19 have been examined. Claims 2-3, 7-8, and 14-15 have been canceled.

Response to Amendment

3. The rejection under 35 USC 101 is withdrawn.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
5. Authorization for this examiner's amendment was given in a telephone interview with Mr. Richard A. Nebb, Reg. No. 33,540, on 11/06/2009.
6. The application has been amended as follows:

1. (currently amended) A networked system for accessing a piece of content, comprising:

a user Web server service hosted on a first web server and configured to represent a user having an expressed user access scope, the expressed user access scope being expressed in an accessor sentence containing dimensional extents of a security space;

a content Web ~~server~~ service hosted on a second web server and configured to represent the piece of content having an expressed content access scope, the expressed content access scope being expressed in a content sentence containing dimensional extents of the security space; and

a translator configured to translate the accessor sentence and the content sentence into binary sentences, the user Web ~~server~~ service communicating with the content Web ~~server~~ service via a network to access the piece of content when the expressed user access scope overlaps with the expressed content access scope as determined from the binary sentences.

4. (currently amended) The networked system of Claim 1, wherein the translator includes a compiler Web ~~server~~ service for compiling the accessor sentence and the content sentence into the binary sentences, each binary sentence comprising binary phrases.

5. (currently amended) The networked system of Claim 4, further comprising an evaluator Web ~~server~~ service for comparing the accessor sentence and the content sentence to determine whether to grant access to the user Web ~~server~~ service so that the user Web ~~server~~ service can access the piece of content.

6. (currently amended) A computer-implemented method for evaluating the scope of a content access request by a user, the method comprising:

requesting a discovery framework by a user Web ~~server~~ service hosted on a first web server to access a piece of content represented by a content Web ~~server~~ service hosted on a second web server;

notifying the content Web ~~server~~ service by the discovery framework of the access request by the user Web ~~server~~ service;

translating a user access scope sentence and a content access scope sentence by a sentence translator into binary sentences; and

requesting the discovery framework by the content Web ~~server~~ service for an access evaluator Web ~~server~~ service to evaluate whether an access scope of the user Web ~~server~~ service overlaps with an access scope of the content Web ~~server~~ service as determined from the binary sentences to grant access to the piece of content, the access scope of the user Web ~~server~~ service being conveyed in a first expression independently from a second expression that conveys the access scope of the content Web ~~server~~ service, the access scope of the user Web ~~server~~ service being expressed by the first expression in a user access scope sentence containing dimensional extents of a security space and the access scope of the content Web ~~server~~ service being expressed in a content access scope sentence containing dimensional extents of the security space.

9. (currently amended) The method of Claim 6, wherein translating includes compiling the user access scope sentence and the content access scope sentence by a sentence compiler Web ~~server~~ service into the binary sentences, each binary sentence having binary phrases, each binary phrase being a compiled dimensional extent.

10. (currently amended) The method of Claim 9, further comprising evaluating the binary sentences by the access evaluator Web ~~server~~ service, the act of evaluating including comparing each binary phrase of a first binary sentence with each corresponding binary phrase of a second binary sentence to form a resultant binary sentence.

11. (currently amended) The method of Claim 10, further comprising granting access to the user Web ~~server~~ service if each binary phrase of the resultant binary sentence is greater than zero.

12. (currently amended) The method of Claim 11, further comprising denying access to the user Web ~~server~~ service if one binary phrase of the resultant binary sentence is equal to zero.

Allowable Subject Matter

7. Claims 1, 4-6, 9-13, and 16-19 are allowed.
8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
